

Pearl Wallet for Android.

Purpose-built for the
PoUW & AI Vanguard.

TARGET_ARCH: native_android
ENGINE: oyster.aar
STATUS: zero_compromise

Refusing Manufactured Asymmetry

Standard Mobile Wallets

ARCHITECTURE

Dependent on
trusted RPC servers

KEY SOVEREIGNTY

Locked
ecosystems

MARKET DATA

Server-side
fiat lock-in

The Pearl Standard

On-device SPV sync
(Ports 44107/44109)

Multi-seed
isolated vaults
(wallet-<hash>)

Decentralized
/api/public fallback;
gracefully degrades

Don't fly blind. Don't trust servers.

True SPV: The Chain in Your Pocket

TECHNICAL SCALE

0.0000 - 03.00

NU88 # 3Y28 SUDOTA # 1A86 5638%

TECHNICAL SCALE

Zero Reimplementation.

The Surface: Native Kotlin + Jetpack Compose UI. No WebViews.

The Bridge: Reflection-based OysterBridge linking UI to the engine.

The Core: The exact battle-tested Go engine from the Pearl desktop daemon embedded as an AAR.

Capabilities: Native HD key derivation, Taproot (BIP-86), and raw transaction **signing run untouched in Go.**

0.0000 - 03.00

NU88 / # 3Y28 SODOTA # 1486 66387

The Miner's Command Center.

Unconfirmed vs. Confirmed
yield breakdown
(CalculateBalance(0) -
CalculateBalance(1)).

Real-time hashrate,
block time, and difficulty
queried natively from
/api/public.

Live 1D/1W/1M order-book
sparkline charts from
OtcPricingApi. Never fly
blind on the fiat value of
your yield.

Granular Yield Management.

The Capture-Free Seed Scanner.

Step 1: Frame Analysis:
MLKit reads the BIP-39 phrase directly from live camera frames.

Step 2: Memory-Only Processing:
Stops at the first valid frame. No photos taken. Zero gallery access.

Step 3: Instant Flush:
The visual data is discarded immediately.

Bonus Feature: Word-by-word TextToSpeech dictation (MnemonicDictator) for creating secure, handwritten paper backups without screenshots.

The Vault: Uncompromising Security.

Ring 1 (Core):

AES256 SIV/GCM Android Keystore encryption for mnemonics.

Ring 2 (Passphrase):

App-managed 32-byte SecureRandom hex passphrases. You never type them; the app seals them.

Ring 4 (Lifecycle):

ProcessLifecycleOwner auto-locking. Configurable 0-60 min slider kills access when backgrounded.

Ring 3 (Access):

BIOMETRIC_STRONG gates for private key exports and seed reveals.

9.0008 - 63.68

NUM # 3V28 S0007A # 1488 6636Z

Safe Evangelism & Ecosystem Growth.

Multi-Seed Caching:

Import a friend's seed or create a demo wallet without wiping your main mining node. Switch instantly. One shared SPV chain backend, isolated cryptographic subdirectories.

Frictionless Onboarding:

Built-in, fully disclosed AD-1 OTC Telegram referrals. Seamlessly route new users to 1.8% PRL/USDC swaps without involving the wallet engine.

9.0008 - 63.88

NU# # 3V28 S0007A # 1488 6630Z

The Ultimate Grassroots Catalyst.

Cryptographic rigor
of a desktop node.

**Frictionless,
glassmorphic**
mobile UX.

Every miner becomes a
walking, fully-verifiable
evangelist for the Pearl
PoUW network.

No reimplementat**ion. No compromise.**
Sidelo**ad the APK or download from the Play Store.**
