

PEARL WALLET // ANDROID EDITION

Native Android Command Center for Pearl Miners

Purpose-built for Pearl Miners. A unified interface for security, network intelligence, and market execution.

The Divergence in Wallet Architecture

Standard Reference Wallet

Pearl Wallet

Seed
Handling

Copy-paste risks

- **Offline write & scan**

Network
Data

Chase external
explorer tabs

- **The numbers live
in your wallet**

Market
Awareness

Blind - the reference
wallet shows none

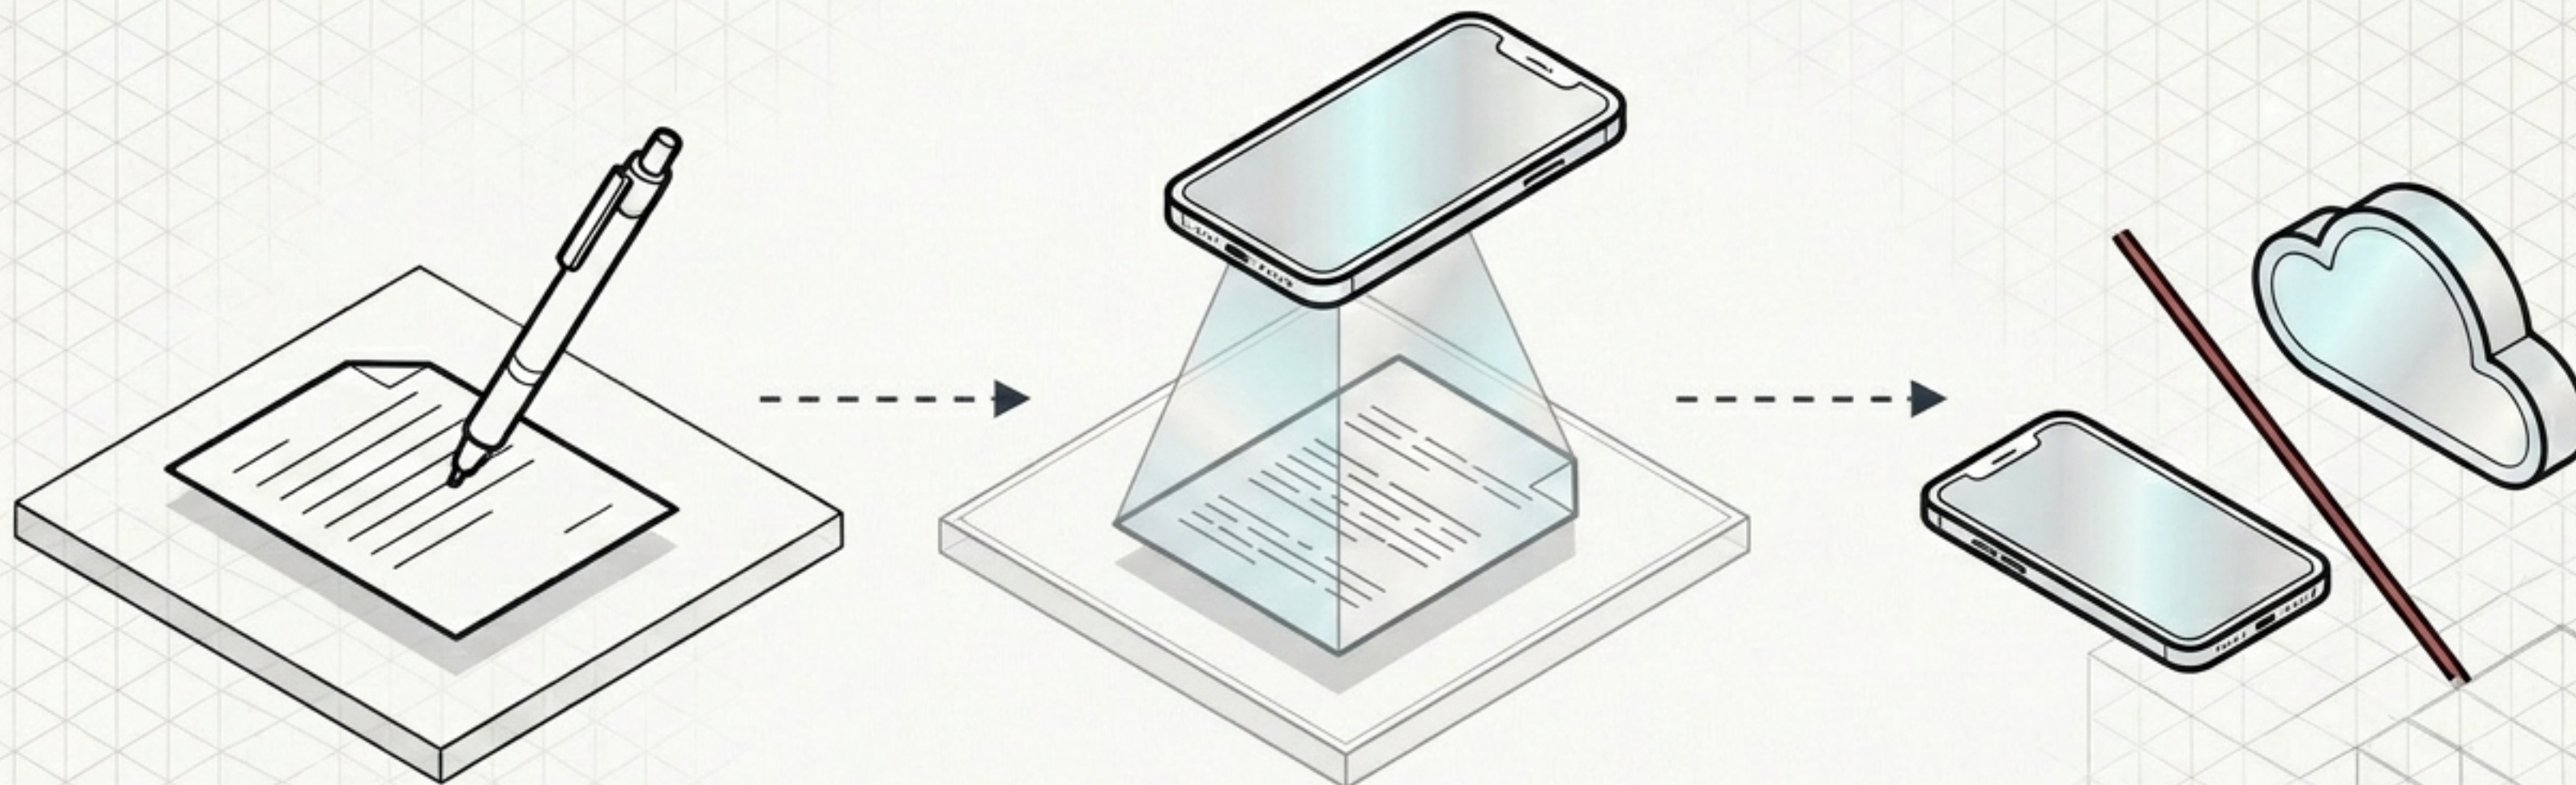

- **Live OTC rates**

Design
Intent

Generic holders

- **Purpose-built for
Pearl Miners**

Zero-Trust Seed Recovery via Optical Character Recognition

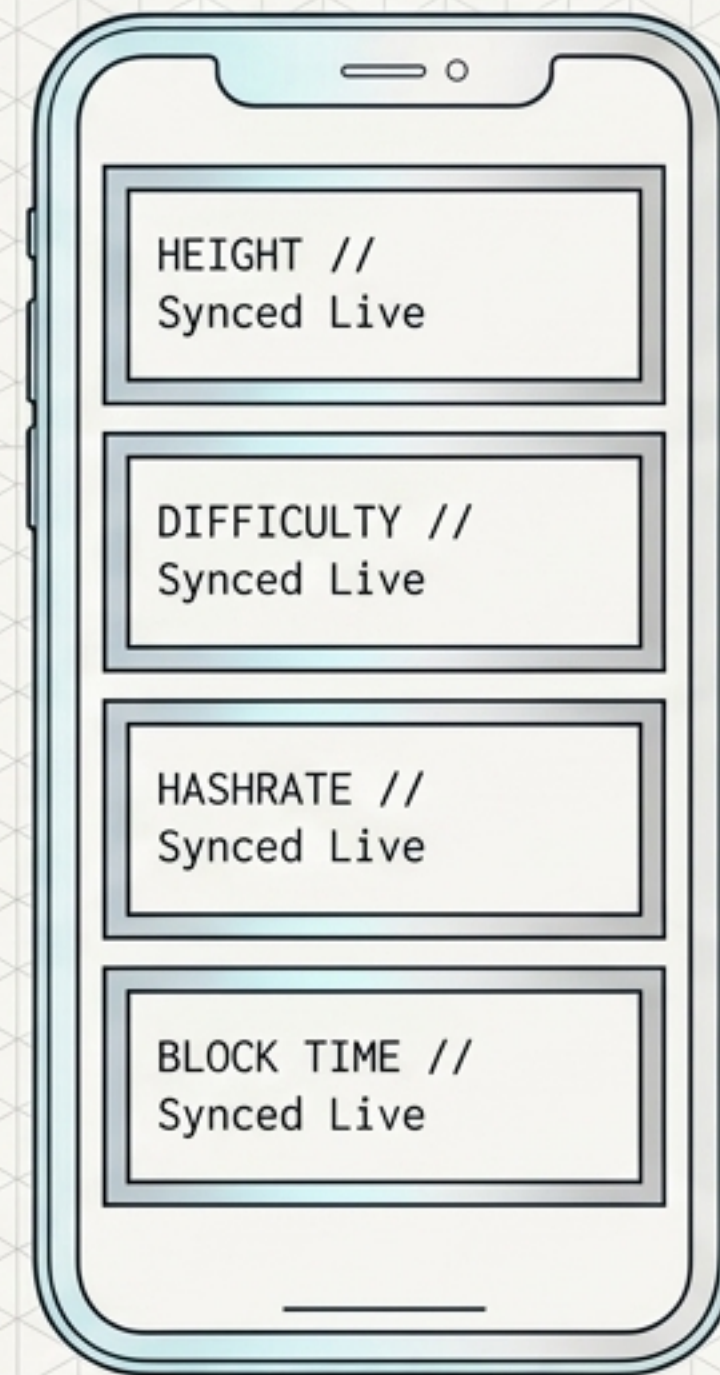

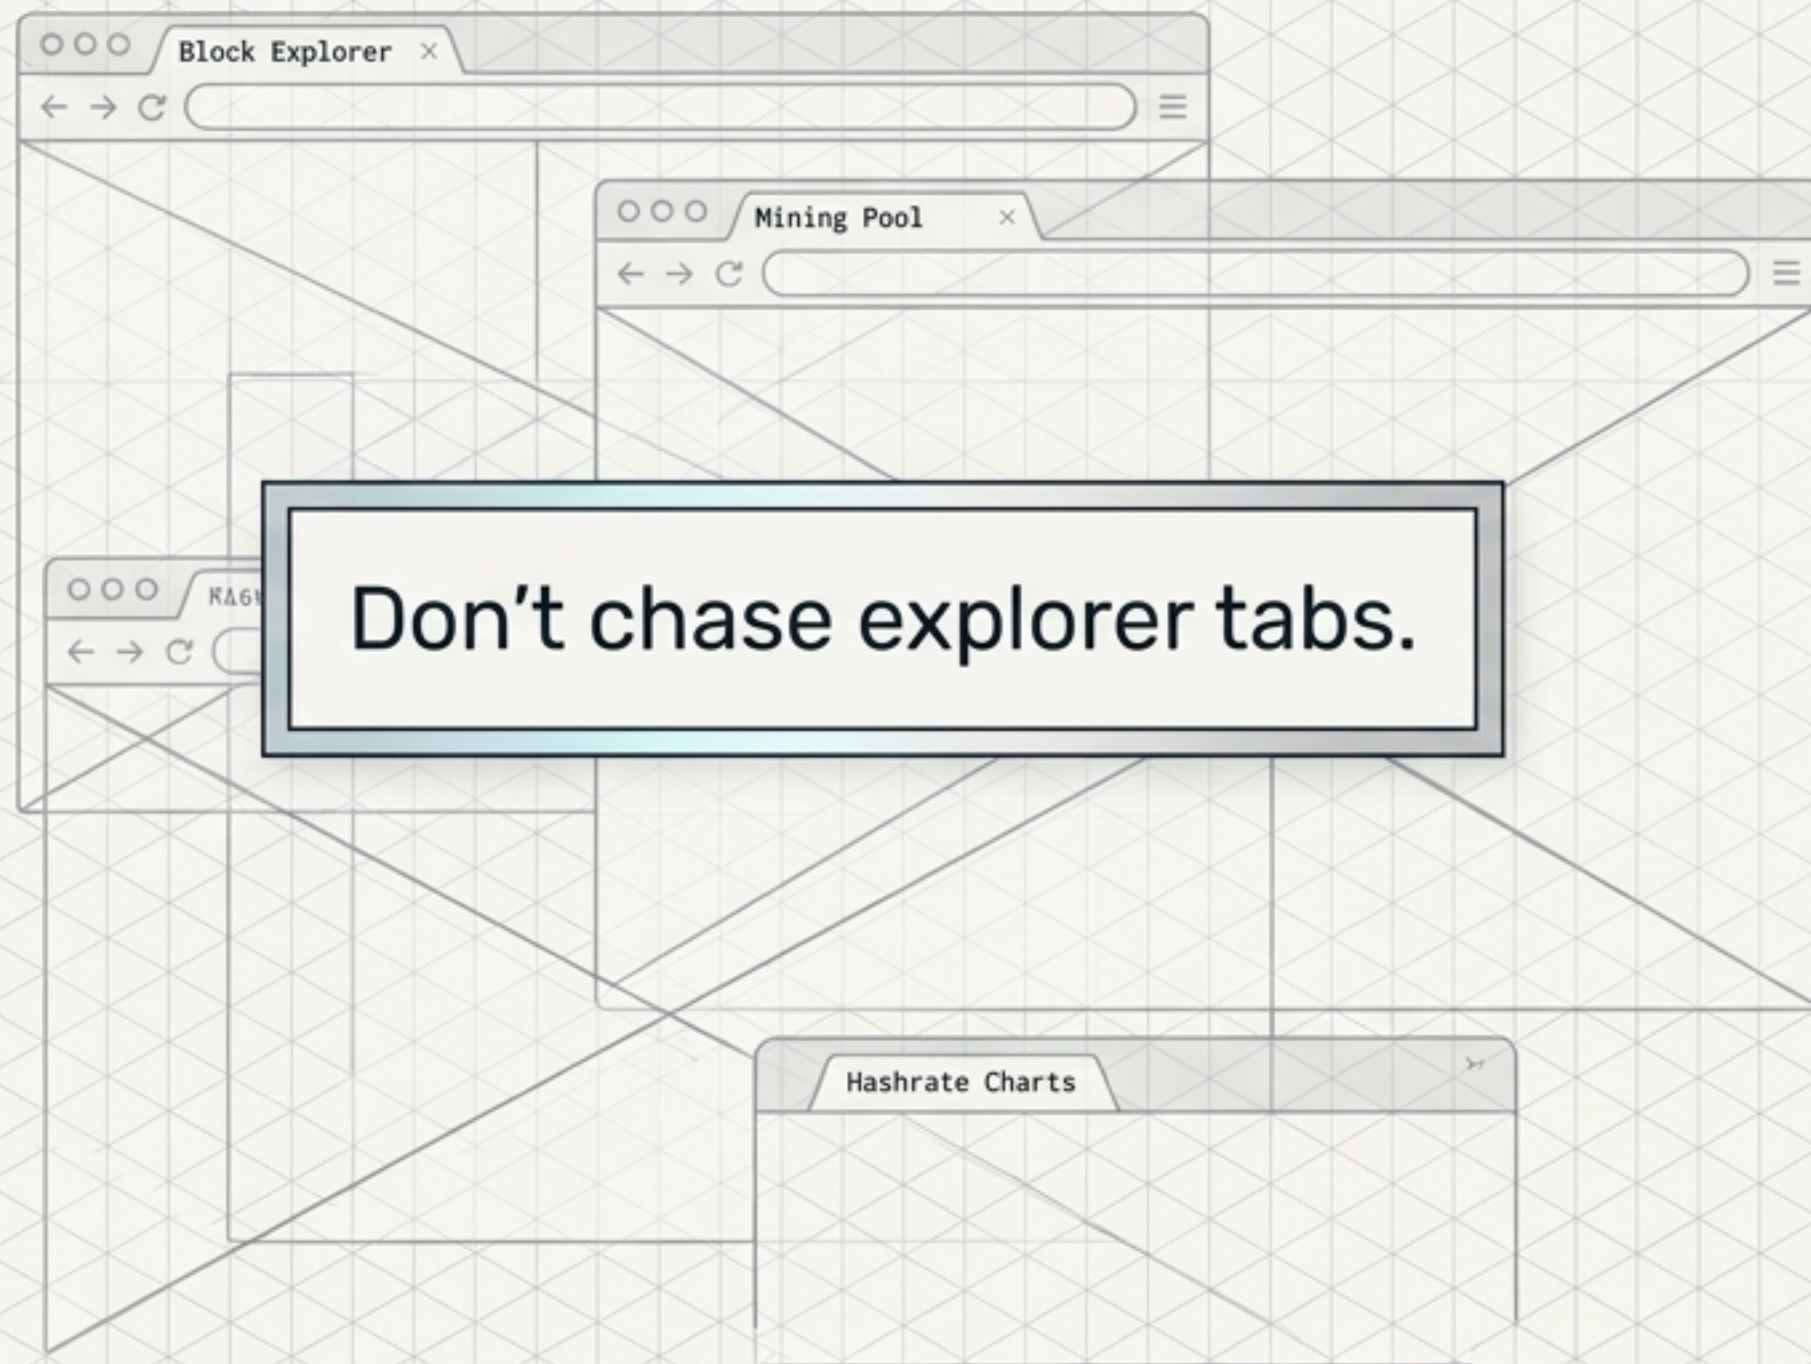

Write your backup on paper. Don't copy-paste your seed.

Point your phone at the words. We OCR it.

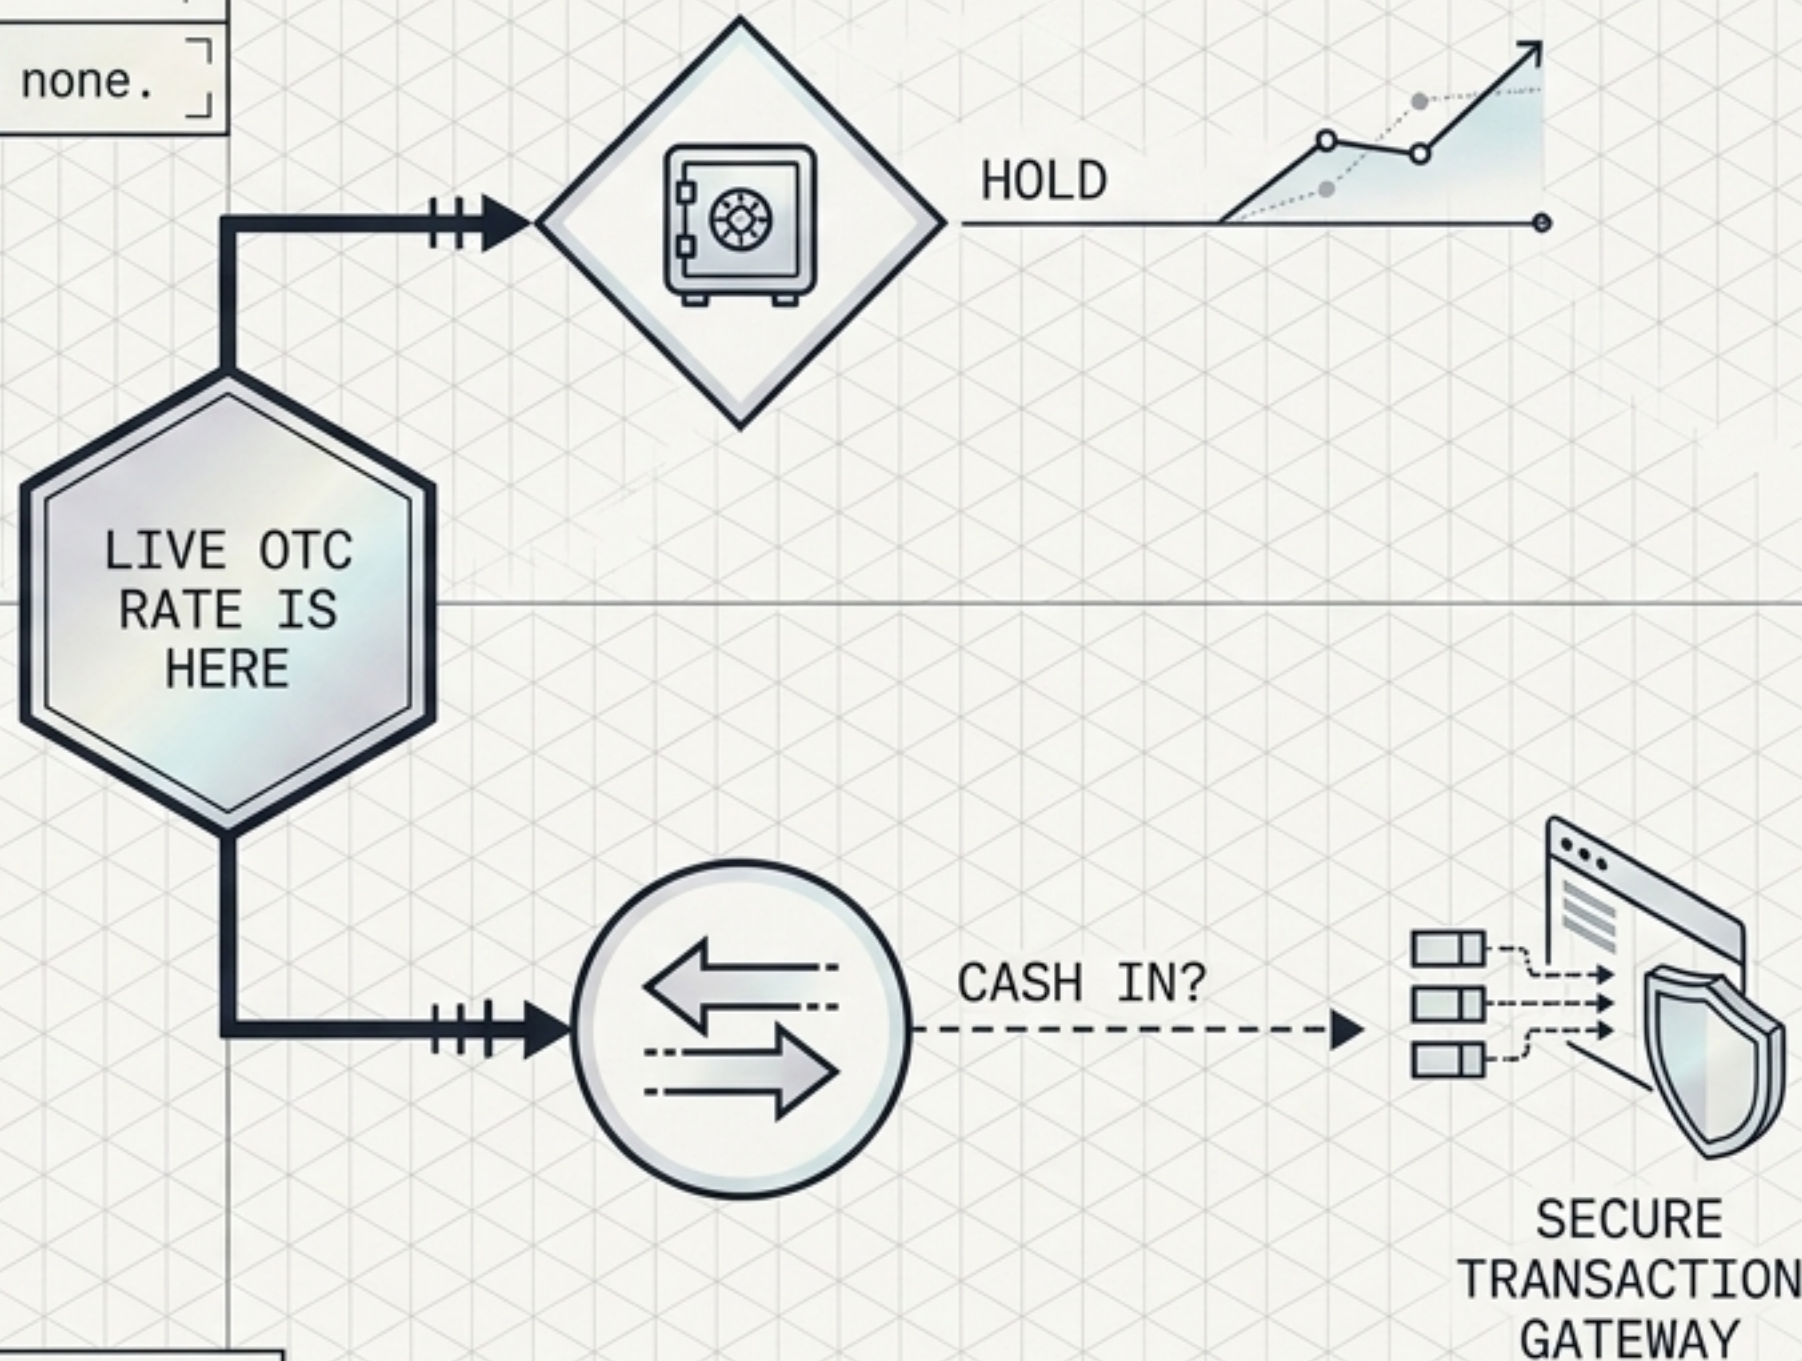

Nothing stored. Pure localized execution.

Eliminating the Block Explorer Dependency

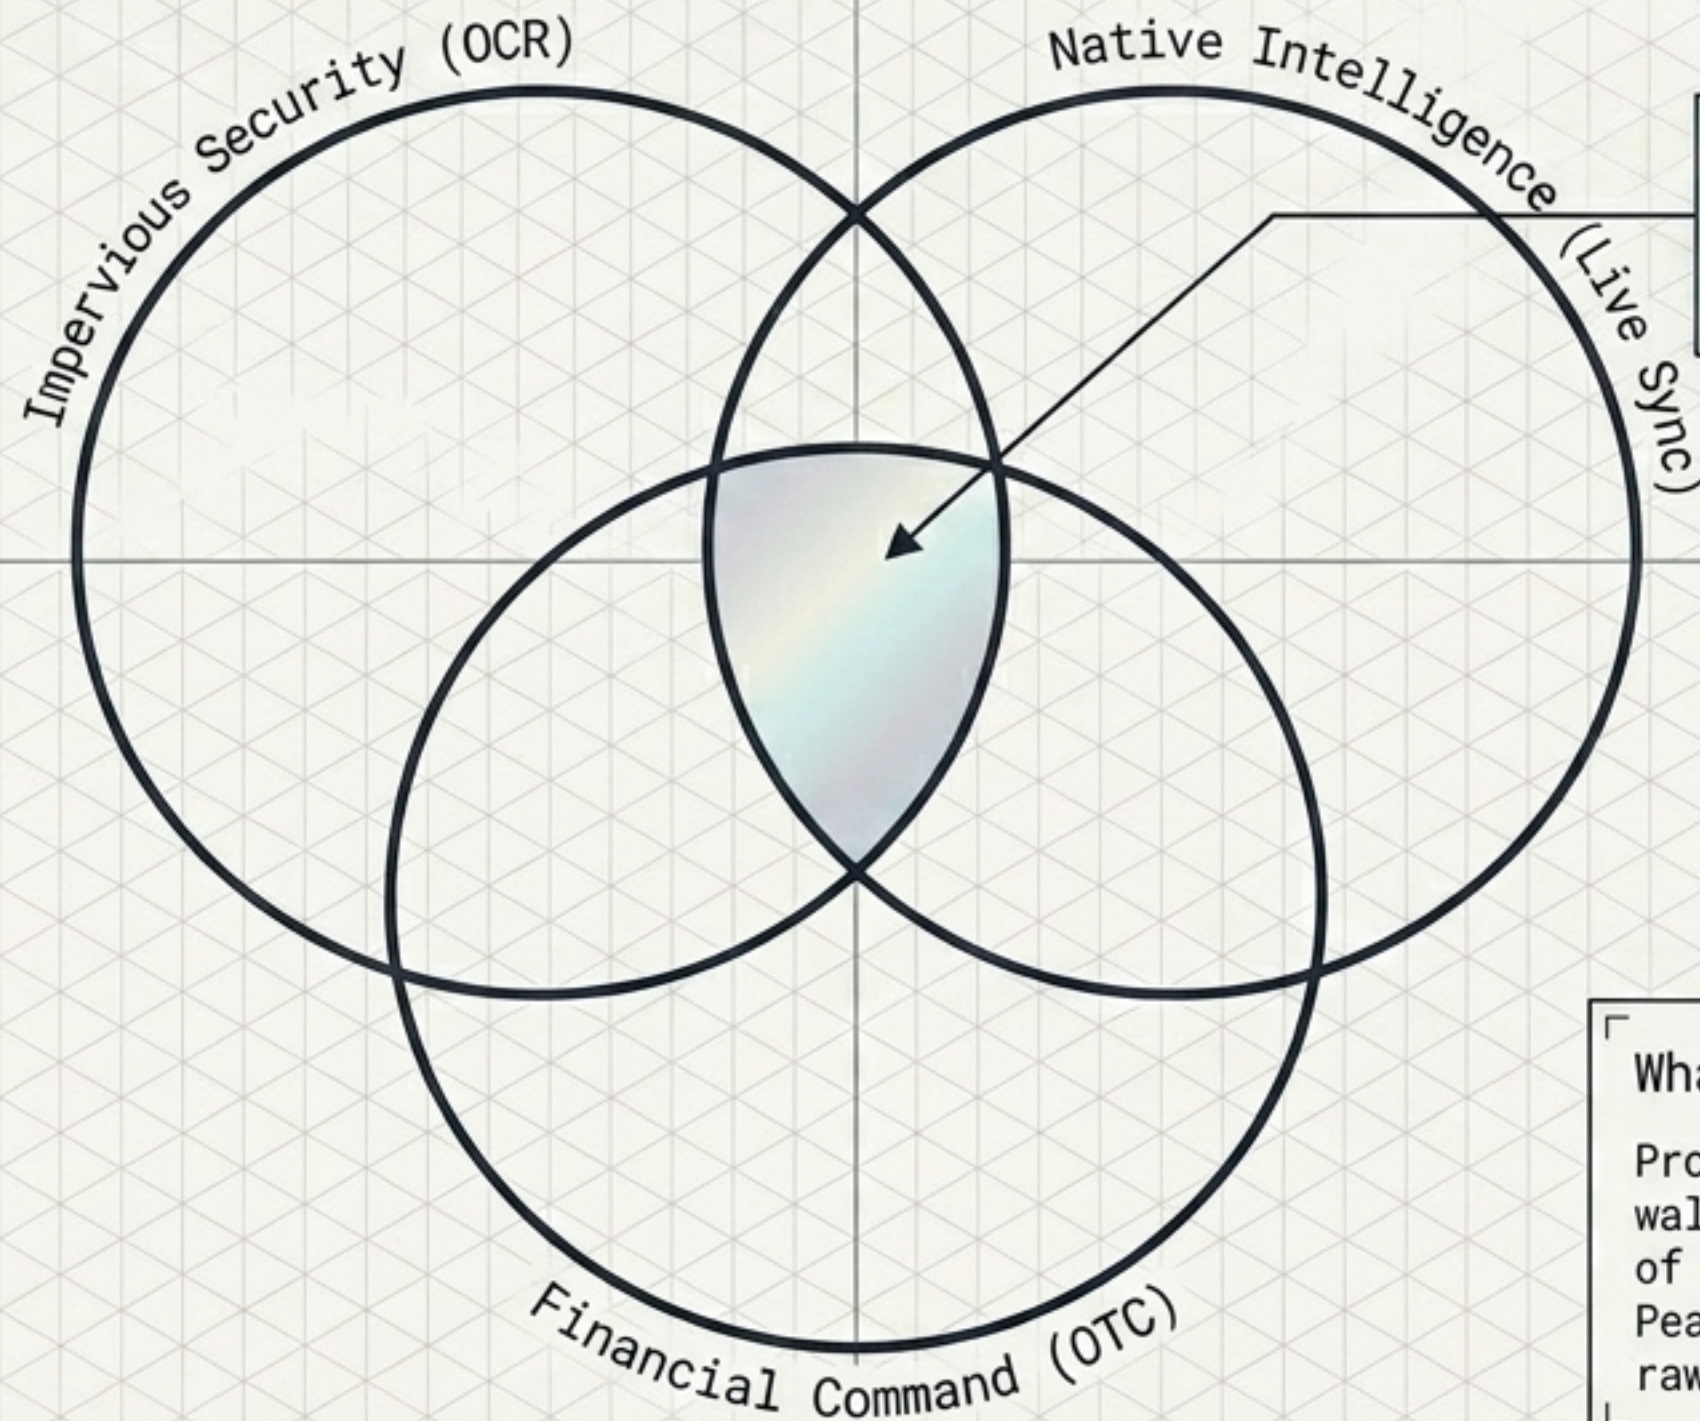

Real-Time OTC Pricing and the Miner's Decision Matrix

Don't fly blind on price. The reference wallet shows none.

Your call. Executed instantly from the wallet.

The Central Nervous System for Proof of Useful Work

Pearl Wallet:
The PoUW Core

What is PoUW?

Proof of Useful Work requires a wallet that matches the sophistication of its miners. Pearl Wallet bridges the gap between raw compute and financial execution.
